

GTM - Gemini Training Material

The overall objective of Gemini Training Material is to provide training and development learning material solutions to clients in all of Africa in the form of standard, customised and public learning programmes / workshops.

Training/Learning material development services

We create learning / course material to assist training providers to gain accreditation for skills programmes (using individual unit standards) and for full qualifications. We have supplied material to various training providers that have successfully gained their accreditation, using our material.

The materials are created in individual unit standard and/or integrated learning modules in learning material sets. Each learning material set consists of the following:

- Learner Guide
- Learner Workbook (formative assessment)
- Learner Portfolio of Evidence Guide (summative assessment)
- Facilitator Guide with Memorandum
- Assessor Assessment Guide with Memorandum
- Assessor Feedback Document
- Moderation Plan, Guide and Report
- Programme Curriculum, Strategy and Alignment document
- Optional extra: PowerPoint slides can be created at an additional cost

Please note that we cannot sell "accredited training material" as the accreditation processes of the SETAs are linked to the individual training providers and the training provider's Quality Management System, rollout plans, etc. We can therefore only supply you with "**Accreditation Ready**" material and we undertake to correct the material to meet the requirements of the various SETAs, as the training provider goes through the accreditation process and receives feedback from the SETA verifier.

Gemini Training Material is an organisation specialising in the provision of workplace and business skills training materials. All of our learning programmes are outcomes based focused and aligned to the SAQA qualification and unit standard requirements.

We offer a business-to-business service of customising the learning programmes to meet our clients' specific training needs.

Our team of professional programme developers are supported by qualified facilitators, assessors and moderators, to ensure that the standard and customised programmes meet our clients' specific training and development needs. Course material developers are drawn from the top ranks of business, academia, the legal fraternity and other specialised areas. Only material developers with an excellent reputation in the market place are invited to join the company. Every course is a dynamic learning session of the required theory, practical application and motivational learning.

We endeavour to earn a reputation for excellence in the design and delivery of high quality training and development materials in all sectors of business.
